

My name is Dr. Huy Vu. I am a primary care physician for both adults and children. I have been serving at Carney and in the Dorchester community for over 20 years and I am a resident of Jamaica Plain.

My current office is located at Carney Hospital but I also worked for many years at the former Little House Health Center in the Savin Hill neighborhood of Dorchester.

I have seen many changes in health care since I started practicing in Dorchester but Carney Hospital has consistently supported me in caring for my patients.

The Carney Hospital Community Benefit program does extensive outreach to the community. This year we hosted an Immigrant's forum entitled the "Value of Culture and Medicine. Panelists included representatives from the Boston Public Health Commission, The Department of Public Health, Carney Physicians and elected officials. Health issues affecting the minority communities we serve, Haitian, Vietnamese and Latino were discussed.

The proposed transaction with Cerberus Management will allow Carney Hospital to continue to offer programs like this and many more to the community.

As a physician serving those communities, I believe that the proposed sale of Caritas to Cerberus gives me the best opportunity to continue to care for my patients in a high quality hospital. I ask you to support this sale. Thank you.
